

PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience developing enterprise full-stack and AI-powered applications using Python, FastAPI, React, TypeScript, Azure OpenAI GPT-4, MongoDB, and SQL databases. Experienced in RESTful API development, conversational AI, RAG systems, testing, debugging, cloud technologies, and production deployments.

WORK EXPERIENCE

- Accenture

Software Engineer

Dec 2025 – Present

Pune, India

 - Enhanced user self-service efficiency by approximately **30%** by developing an embedded AI assistant integrated into enterprise applications using **React, Python, FastAPI, RESTful APIs, and Azure OpenAI GPT-4**, enabling secure real-time natural language interactions.
 - Accelerated delivery of enterprise conversational AI solutions by nearly **40%** by developing ChatGPT-style applications using **React, TypeScript, FastAPI, MongoDB, and Azure OpenAI GPT-4** for multiple enterprise clients.
 - Strengthened application security and traceability by implementing authorization, request validation, and audit logging within Python controllers to monitor user requests and AI-generated responses in compliance with enterprise standards.
 - Optimized request processing by orchestrating request preprocessing and integrating Azure OpenAI GPT-4 through the DevNinja V5 gateway, ensuring secure communication between enterprise applications and LLM services.
 - Standardized reusable React and TypeScript chatbot components, reducing frontend development effort by approximately **35%** across multiple client implementations.
 - Elevated response relevance and user satisfaction by nearly **20%** through prompt optimization, system instruction refinement, and iterative validation with business stakeholders.
- Accenture

Associate Software Engineer

Jul 2023 – Dec 2025

Pune, India

 - Reduced incident response time by **35%** by developing an intelligent alert automation platform integrating Jira and ServiceNow APIs to automatically route tickets based on priority, ownership matrices, and shift schedules.
 - Automated alert escalation workflows using Java, Angular, Node.js, and MySQL, decreasing manual intervention by approximately **40%** while maintaining real-time audit records.
 - Minimized production downtime by nearly **25%** through application troubleshooting, production support, and cross-functional collaboration during enterprise application deployments.
 - Improved application quality by performing unit testing, integration testing, debugging, and end-to-end validation across full-stack applications prior to production releases.
 - Collaborated with cross-functional Agile teams to deliver scalable enterprise applications, participating in code reviews, deployment activities, and post-production support.

PROJECTS

- Enterprise Document Intelligence Platform using Retrieval-Augmented Generation (RAG)

Python, FastAPI, OpenAI API, FAISS, React

 - Elevated answer quality by approximately **40%** by implementing Retrieval-Augmented Generation (RAG) pipelines incorporating semantic chunking, embeddings, vector search, and prompt orchestration.
 - Minimized information retrieval time by nearly **50%** by developing embedding-driven semantic search capabilities across large unstructured document repositories.
 - Shortened end-to-end inference latency by **30%** through optimization of FastAPI services and LLM inference workflows.
 - Streamlined service reliability by approximately **20%** by implementing comprehensive monitoring, logging, and error-handling mechanisms.
 - Decreased hallucinated responses by approximately **25%** using vector-based contextual grounding during LLM response generation.

TECHNICAL SKILLS

- Core Skills:

 - Generative AI:** Azure OpenAI GPT-4, OpenAI API, Retrieval-Augmented Generation (RAG), Prompt Engineering, Embeddings, Vector Search, Semantic Search
 - LLM Frameworks:** LangChain, LangGraph (Working Knowledge), Agentic AI Workflows
 - Programming Languages:** Python, Java, TypeScript, JavaScript, SQL
 - Backend Development:** Python, FastAPI, RESTful APIs, Microservices, API Integration, Authentication, Authorization
 - Frontend Development:** React.js, Angular, TypeScript, JavaScript, HTML5, CSS3
 - Databases:** MongoDB, PostgreSQL, MySQL, FAISS
 - Cloud & DevOps:** Google Cloud Platform (BigQuery, Cloud Storage, Cloud SQL, Vertex AI), Azure OpenAI Services, AWS (Exposure), Docker, Kubernetes, Jenkins, Git, CI/CD

CERTIFICATIONS

Google Cloud Professional Machine Learning Engineer (2025) | Google Cloud Associate Cloud Engineer (2025) | Google Cloud Digital Leader (2025) | Google Cloud Associate Data Practitioner (2025) | AWS Cloud Practitioner (2022)

EDUCATION

- Madhav Institute of Technology & Science

Bachelor of Technology

Aug 2019 – Jun 2023

Madhya Pradesh, India
